# Weekly Payment Stores

The buy now pay later store catalogues offer the best in convenient and worry free shopping. This form of shopping is expedient because you can buy the things that you need and want without leaving the comfort of your home or office and at the same time, you do not have to instantly pay for what you buy unlike in grocery checkout counters where everything that is passed through the POS scanner has to be paid right away. And this form of payment flexibility is what is drawing many people into opting for these weekly payment stores.

Weekly payment stores came about due to the need for a more financially lax purchasing scheme. The growing unemployment rate and the rise of the number of people who have bad credit has resulted in the dramatic decrease in the purchasing power of a great number of people and because as people more often than not live on credit, the weekly payment stores were hatched in order to help those who are in need of specific items but are unable to pay cash in the meantime. Now, with the weekly payment stores, one will be able to buy a fridge or even a kitchen without any credit check and make weekly repayments for their purchases. So if you badly need a new washing machine or a tumble drier, these weekly catalogue payment stores provide a better payment option for you especially when times are hard.

You can make monthly payments to the [weekly payment stores](#)
